

Dimensions of Learning

Tools for building a learning centred approach to teaching

Are your students independent learners with the ability to continue learning throughout their lives?

This 2 day introduction workshop will engage participants **in an exploration** of the 5 Dimensions of Learning, with a specific focus on providing practical activities and knowledge that reflect what is now known about how students learn. The Dimensions of Learning is an instructional framework that incorporates the best of **contemporary** research and **evidence based** theories of learning.

The Dimensions of Learning is an instructional framework that incorporates the best of research and theories of learning. This model examines learning in relation to modes of thinking and is based on the premise that successful learning is based on five types of thinking:

- Dimension 1: Attitudes and Perceptions about Learning
- Dimension 2: Acquisition and Integration of Knowledge
- Dimension 3: Extension and Refinement of Knowledge
- Dimension 4: Meaningful Use of Knowledge
- Dimension 5: Productive Habits of the Mind

The Dimensions of learning is a powerful tool for ensuring that learning is the focus of what we do as educators. To find out more about DoL you may wish to explore the following sites: The McRel official site on DoL <http://www.mcrel.org/dimensions/index.asp> or CQU site on DoL <http://www.cqu.edu.au/dol/>

Cost per participant for the 2 day workshop

ANSN member: \$270

Non-members: \$310
